codet

Teaching the next generation of coding cadets

codet is a website that teaches **programming** to **9-15 year olds** who have never coded before

Learn with tutorials
that guide you through each topic!

- Learn the **world's most popular programming language**, for free
- Everything explained from **basic concepts**
- Plenty of hints so you **never get stuck**
- Opportunities to **practice** to check you understand
- Learn **at your own pace**, with or without help, **from anywhere** with an internet connection

Create your own amazing projects
through fun **challenges**
such as building games!

- Build **real projects** that show off your skills
- Come up with your own **creative designs**
- **Have fun** playing all the games that you've built yourself

Get rewarded with codettos for coding often
and having fun with your friends!

- **Get rewarded** for all of your hard work with experience points
- **Unlock new themes**, avatars and animations
- Share your favourite projects **with friends**, and work together on something even more exciting

Visit **codetlearn.ml** to try it out!
